The new printer Famjet Maxi has been designed to print Hi-resolution informations (up to 750 dpi) on porous, semi-porous and non porous materials. The new single 25,4mm (1") cartridge design provides perfect 1" alphanumeric characters, logos and Barcodes and 2D codes.

The use of a single 1" (25mm) print engine avoids complicated cartridges alignments that always provide poor printing quality in real applications. With the new Famjet Maxi-Dual printhead you can print up to 50mm (2") messages.
